PROJECTS

Athlete Ecommerce Store

Created a responsive e-commerce platform with Python and Django for female athletes, featuring user authentication, order management, secure payments, and a comprehensive product catalog.

Git Repo : <https://github.com/Vyshnaviprasee/ecart.git>

E-Learning Platform for Students

Developed an e-learning platform allowing registered students to purchase courses and enroll in them. Implemented user authentication for secure access. Key features included course purchasing, enrollment functionality, and user-friendly navigation.
